## Known Issue

### **Mac OS Sierra (10.12) compatibility note**

2 different builds of the macOS 10.12.1 version have been successively released by Apple: build 16B2555\* (published on 24<sup>th</sup> October 2016) followed by build 16B2657\* (published on 27<sup>th</sup> October 2016).

An incompatibility has been detected for build 16B2657 whereas 4D products are fully compatible with build 16B2555\*.

We have noted a significant improvement of the 4D products behavior with the mac OS 10.12.2 beta version.

As a consequence, we have decided to postpone the macOS Sierra certification until the final version of 10.12.2 has been shipped by Apple.
