Windows 64-bit products become final in v16 R2

After a long preview period, **4D Developer** and **4D Volume Desktop** for **Windows 64-bit** become final in v16 R2. You will find more details in the certification matrix.

v16 Rx – v16.x compatibility note

It is possible to open a 16.Rx database with 4D v16.x versions and vice versa. Just keep in mind that new features being only available in the R-releases, opening a v16 Rx database with a v16 version, the code using new features won't work and should be deactivated.

4D Pack removal

The 4D Pack plugin is no longer distributed in the installers. Please, note that 4D v16.x 4D Pack is compatible with 4D v16 Rx.
